SKILLS

Programming Language : Python (Advanced), Machine Learning, Deep Learning, CNN, RNN, Tensorflow, Keras, Scikit-learn, Pandas, Numpy, Generative AI, Linear Regression, Power BI

REFERENCE

Naveen Paul - Draw My Career
Co-Founder & C.E.O., Draw My Career

OBJECTIVE

Entry-level Data Scientist with a strong foundation in Python programming, machine learning, and natural language processing (NLP). Experienced in working on academic and personal projects involving data cleaning, exploratory data analysis (EDA), and predictive modeling. Passionate about extracting insights from data and solving real-world problems through data-driven approaches. Eager to contribute to collaborative teams and grow in a professional, fast-paced environment.

EXPERIENCE

Luminar Technolab

2024 - 2025

Data Science intern

- NLP Development: Designed and implemented NLP models for text classification and sentiment analysis on real-world datasets.
- Data Analysis: Performed exploratory data analysis to uncover patterns within large datasets, helping teams make data driven decisions.

Draw My Career

February 2026 -

Data Science Manger and Developer

- Analyzed career guidance and assessment data to identify student interests, skills, and career preferences, supporting data-driven decision-making
- Conducted competitor research, data analysis, and report preparation to generate insights for improving career recommendation strategies and platform effectiveness.

EDUCATION

Sree Saraswati Thyagaraja college Pollachi

BSc Artificial Intelligence and Machine Learning

Luminar Technolab kochi

Data Science

PROJECTS

Career Guidance Platform

Career Guidance Analytics Platform

Worked on a data-driven career guidance project focused on helping students make informed career decisions. Collected, cleaned, and analyzed career assessment and user engagement data to identify patterns in interests, skills, and career preferences. Conducted competitor research, data visualization, and insights generation to support career recommendation strategies. Collaborated with the team to improve decision-making through data analysis and reporting.

Real-time Object detection system

Real-time object detection system using CNN to classify 8 objects (buildings, computer, forest, helmet, mouse, smartphone) from webcam feed.
